Spring Flowering Bulbs

Their Popularity & Culture.

YEAR by year our trade is constantly increasing for these beautiful Spring Flowering Plants, and during the past few seasons we have given special attention to the quality, size and soundness of all the Bulbs we offer. The large demand last year has proved to us that Bulbs are becoming more popular than ever. We exercise great care in all cases to send only Bulbs true to name and color. Our collection of Gladioli, which have been a speciality with us for many years past, is still unsurpassed in the Commonwealth, and we have this year added to our already fine collection many other new and beautiful varieties.

Anderson & Co.

GLADIOLI
NANCEIANUS

For Full List
See Page 3.

The Soil . . .

Bulbs will grow in almost any well worked soil; they mostly prefer a sandy loam but will grow in almost pure sand if well enriched. Strong stiff soil, however, must be thoroughly broken up, well drained and lightened by the addition of sand or vegetable matter, such as leaf mould, etc., before it can be made suitable for planting. Often a green crop grown on land after its preparation and dug in would greatly help to bring the soil into proper condition. After the land has been deeply dug for the reception of Bulbs, it is always better to allow it to remain for a week or two, so as to allow the soil to settle, otherwise the Bulbs may sink too deeply in the soil.

The Planting . . .

When planting Bulbs the size of the Bulb always should be taken into consideration; for instance, a Hyacinth Bulb measuring 2 inches diameter requires a covering of 2 inches only, and the same may be taken generally with the planting of all others, giving them a covering of soil equal to the diameter measure of the Bulb. For late planting of Gladioli, the depth should be increased so that the Bulbs may escape the surface heat of Summer. According to the varieties, planting should be done in groups, beds or rows, and the distance determined by the size of the plants when grown. The soil must on no account be wet or sticky at the time of planting, and if at all loose should be made firm with the foot. Where it is inclined to be stiff, a little sand at the base of the Bulbs will greatly help the drainage and prevent rotting, as in many cases failure is due to too much moisture.

Manuring and Mulching . . .

Bonedust is one of the safest manures that can be used if well incorporated with the soil at time of planting. Most flowering Bulbs dislike Ammonia, and fresh stable manure, fowl-yard manure should be avoided. Well rotted stable or cow manure which has been maturing for some considerable time can be safely used, but should be well dug in at the base of the Bulbs and not allowed to touch them when planting. In the case of Daffodils the manure is intended to hold the moisture like a sponge and is not intended as a fertilizer. For Summer flowering Bulbs such as Gladioli, Lilliums, Montbretias, a top dressing of old stable manure or decayed vegetable matter placed over the surface of the soil to the depth of about 2 inches is invaluable, as it keeps the roots cool and retains the moisture in the soil. It is not necessary for early Spring Flowering Bulbs; for these the soil should be kept well open with a hoe.

Time to Plant . . .

The time to plant is given with each variety throughout the catalogue.

Ranunculus and Anemones . . .

Special Cultivation. Where it is intended to make beds of either Ranunculus or Anemones by themselves, a good way is to first start the Bulbs in shallow boxes in good sandy loam well drained. When the Bulbs have started into growth, and are about 2 inches high, the sides of the box can be taken away and each plant cut out carefully with a knife and planted about 9 inches apart each way in the beds. In this way gaps in the beds are avoided as there is always a small percentage of both Ranunculus and Anemones which fail to germinate.

ANDERSON & CO.'S Choice Flowering Bulbs.

The Lovely Anemone

Plant March till June.

Anemones are deserving of a place in every garden, and we cannot too highly recommend them. Their matchless variety of colour, and endless shades of crimson, scarlet, lilac, rose, blue, purple, and white, together with the wonderful markings and blotches of colour, renders them very attractive. They are most beautiful as cut flowers, and will last for a week in water. The plants bloom for a long time, and by successional planting they can be had in bloom for three months. They prefer a fairly strong soil, well drained; the bulbs should be planted about six inches apart and covered about an inch.

- | | |
|--|------------------|
| Dutch Single. Mixed. All colours; a splendid assortment. | 1s doz.; 5s 100 |
| Dutch Double. Mixed. Including many brilliant shades of colour | 1s doz.; 5s 100 |
| Dutch Single Scarlet. Very showy | 1s doz. |
| Dutch Double Scarlet. Brilliant and very double | 1s doz. |
| Blue Single | 1s doz. |
| The Bride. Single variety. Beautiful pure white: flowers very freely | 1s doz. |
| Chrysanthemum-Flowered. Mixed. A very distinct class, with large handsome, double flowers; petals regularly incurved | 1s 6d doz. |
| St. Brigid. A beautiful strain of the Chrysanthemum-flowered Anemones, double and semi-double flowers | 2s doz.; 14s 100 |
| Improved St. Brigid Anemone. This is a much improved strain and imported especially by us this year from the home of its origin, Dublin. It is the most beautiful of all Anemones, the wonderful markings and range of colours are unsurpassed. This strain is the winner of the Silver Medal Dublin, 1907 and 1908, Special Medal and First Prize, Edinburgh, 1908. The flowers are semi-double and single mixed | 3s doz.; 20s 100 |
| Fulgens (SCARLET WINDFLOWER). Dazzling scarlet; light elegant growth | 2s 6d doz. |
| Fulgens, fl. pl. Double variety of the handsome Scarlet Windflower | 2s 6d doz. |
| Double Named and Distinct Varieties | 2s doz |

Amaryllis.

Plant February till May.

- Vittata** (HIPPEASTRUM). **Hybrids.** These produce flower stems from 18 inches to two feet, surmounted by remarkably handsome, large heads of trumpet-shaped flowers; fine border plants of easy culture
- | | |
|--|-----------------|
| Kermesinum. Terra-cotta | 1s each |
| Belladonna. This splendid species is very variable in size and colour, producing variously shaded flowers from almost white to the deepest pink; they thrive best in light soil | 1s each |
| Formosissima (SPREKELIA). The Jacobean Lily. Showy bulbous plants, with beautiful brilliant crimson flowers; a handsome border plant | 6d each; 5s doz |
| | 1s each |

SINGLE ANEMONE.

FREESIA REFRACTA ALBA.

Babiana FINEST MIXED, including some beautiful Red shades.
2d ea.; 1s 6d doz.

Plant February till May.

Very showy plants, producing rich self-colours and very distinct hues in the same flower, with long wire-like foliage. To succeed, they should be planted in a light sandy compost. Beautifully sweet-scented.

Brunsvigia Multiflora... 1s each

Plant February till May.

This magnificent border plant forms a handsome crown of flowers on a stem of about three feet, containing from 18 to 24 separate blooms; the colours are pink and white, with a delightful perfume; will flower first season.

Freesia A great favourite.

Plant February till May.

These flowers have a delicious perfume, and are of great value for cutting; each bulb bears more than one stem with eight or ten flowers. Most desirable pot plants, but they are perfectly hardy out of doors; should be planted four inches apart, and lightly covered; from five to eight inches high.

Refracta Alba. White; sweet-scented; very fine 6d doz.; 3s 100

Extra Large Bulbs for pot culture 9d doz.; 5s 100

Leichtlini. White, passing to primrose; yellow 9d doz.; 5s 100

Armstrongii (New Pink). A beautiful shade of pale pink, 3d each; 2s doz.

Our post-free Bulb Collections
are Splendid Value

Our Illustrated Seed and Plant Catalogue will be posted in March.

GLADIOLI.

The last lot of Gladioli bulbs I got from you flowered beautifully.

Mrs. W. COLLINS,
Beadesert,
24.9-'08. Brisbane, Q.

For Cheap Hardy Bulbs
see page 12.

Gladioli Gandavensis 1s each; 10s per doz. Plant April to September.

- Angelique.** White tinted flesh, blotch ivory white.
Beaute de Juillet. Satiny rose, salmon tint, striped violet, long spikes.
Beatrix. Pure white ground, delicately flushed carmine lilac.
Carmelite. Salmon rose, shaded with slate
Carmen. Straw color, streaked rose, citron rose at base of petals.
Corsaire. Dark scarlet, tinted brown.
Commandant Marchand. Compact spike, velvety dark ruby.
Carnation. Fleshy white, tinged carmine, blotched purplish carmine.
Daphnis. Rosy salmon, flamed slate, white blotch.
Demosthene. Bright rose, streaked pure white, blotched violet carmine.
Deuil de Saint Pierre. Ashy rose, striped violet, red blotch.
Eugene Souchant. Bright rose, with white blotch.
Fantome. Large pure white flowers, slightly streaked rosy lilac.

Hybrid Gladioli.

The Gladiolus is a charming flowering plant, which can be had in bloom for six months in the year, if frequent plantings are made, as the bulbs can be kept in a dry state for a long period, and can safely be kept out of the ground if necessary until they have a shoot of an inch in length. As cut flowers they are unrivalled, and last a long time in water, and if cut when only the first flowers are expanded, the remaining flowers will open in water. The first planting should be made in April, followed by others right on until October, or later if bulbs are available.

We hold the Premier Collections in Australia of these lovely plants, and are constantly improving it by importing many of the charming new varieties which are raised on the Continent from time to time.

CULTURE OF GLADIOLI.

The culture of Gladioli is exceedingly simple, as they will grow in any average soil; but to grow them to perfection the soil should be of a sandy or loamy nature, and should be well worked or trenched to a depth of 18 inches. No new or green manure should be used in preparing the soil, but old well-rotted stable manure, dug well in so that it does not touch any of the bulbs, will greatly assist in keeping the ground in a moist, open condition, and will promote a strong, hardy growth. A dressing of bone manure can, however, be incorporated with the soil with perfect safety. If planted in rows, the bulbs should be 8 to 10 inches apart, and the rows 2 feet, and covered to a depth of 2 to 3 inches. When the shoots are about 12 inches high they should be tied up to keep them straight. The soil between the bulbs should be stirred up and kept clean. It will not be necessary to water them unless the season is a very dry one, if the ground has been well worked as we recommend, but if watering is reported to let it be done thoroughly if less frequently. A top-dressing of manure over the surface of the soil is an excellent practice in summer. After the plants have finished blooming and show signs of ripening, by their yellow and brown leaves, the bulbs should be lifted and the shoots cut off close to the bulbs; and when the bulbs are properly dried the old sole or bulb should be removed and the new bulbs stored in a dry place until ready for replanting.

GLADIOLI

New Varieties
for 1909. . . .

- Alcibiade.** Large flowers, blood red color, blotched white and edged white; a white band in the middle of each petal. 3/6 each.
Alexandre. Flowers of a clear cinabar-red, ivory white blotch on lower petals. 3/6 each.
Archimede. Flowers large, ashy rose, the lower petals bear ivory white blotch, striped garnet red. 5/- each.
Aristophane. Pure salmon rose, tall spike, straw colored blotch, striped garnet red on lower petals. 3/6 each.
Aristote. Medium size flowers, white suffused rose on edges, lower petals tinged light yellow. 6/- each.
Epicure. Dwarf habit, enormous flowers, white streaked lilac, dark lilac blotch on lower petals. 3/6 each.
General Joubert. Bright salmon rose color, lower petals blotched blood red on lemon ground. 3/6 each.
Leonidas. Tall spikes, whitish ground, spotted clear salmon red, base of petal white suffused violet. 5/- each.
Pausanias. Bright scarlet red, suffused brown at edges, large white blotch on lower petals. 3/6 each.
Platon. Tall spikes, dark lilac, broad white band middle of each petal. 3/6 each.
Socrate. Well shaped flowers, brownish red color, with large ivory white blotches on lower petals. 5/- each.
Sophocle. Medium spikes, fine fiery red, blotched velvety garnet red with small white stripes. 3/6 each.

These varieties cannot be supplied until August for September planting

Our Illustrated Seed and Plant Catalogue will be posted in March.

.. ANDERSON & CO., for Seeds, Plants and Bulbs ..

Choice Gladioli—continued

Gladioli Gandavensis 1s each; 10s doz.—(continued).

- Marguerite Cadeau.** Almost pure white, lilac rose eye.
Neron. Beautiful dark red, suffused violet.
Norma. Pure white, sometimes suffused with lilac.
Nestor. Light yellow, striped red.
Nuée d'Orange. Almost entirely slate colour.
Osmanli. Dark orange-coloured flowers, streaked and spotted white.
Pactole. Beautiful yellow, slightly tinged with rose at the edges; blotch of a darker shade.
Pepita. Golden yellow, edges of the petal slightly striped carmine towards the end of the flowering season.
Perfection. Pale flesh rose, streaked and banded coppery rose.
Sceptre de Flore. White throat, brightening to richest rose, spotted carmine.
Stromboli. Large and beautiful flowers of the deepest scarlet, with pure white blotch.
Therese de Vilmorin. Flowers a creamy white, passing into pure white, few purplish rose stripes in centre.
Tigridia. Salmon yellow, large and open, flamed rosy carmine.
Titania. Beautiful tall spike, creamy salmon, flamed cherry.
Tournefort. Fine spike, flowers carmine red, streaked violet.
Triomphe de Paris. Creamy white, small carmine blotch, shaded gold.

Gladioli Gandavensis at 1s 6d each; 15s doz.

- Admiral Pottier.** Large spike, good flowers, dazzling scarlet red colour.
Chrysomèle. Yellow, striped red, golden blotch.
Gallieni. Immense flowers, intense cinnabar red.
Granite. Beautiful rose, striped and dotted deeper shade, large white blotch.
Grande Conde. Bright salmony rose, striped violet red, fine spike.

Gladioli Gandavensis at 2s 6d each; 27s doz.

- Andre del Sarto.** Large well-expanded flowers, fine cherry red, large creamy white blotch.
Aphrodite. Very large flowers, rose colour, with purplish red blotch on white ground.
Blanchefleur. A superb white.
Delicatesse. Cherry red, marbled purplish red, stripes and blotch creamy white.
La Candeur. Almost white, lower petals suffused straw colour.
Marie Therese. Almost white; a few rosy stripes on straw-coloured blotch.
Martinique. Fine dark red, pale yellow blotch.
Miss Wilmott. Very large spike, pale lemon yellow—almost self, throat carmine red.
Rajah. Magnificent spike, pale yellow, edged with rose.
Safrano. Delicate nankeen yellow, centre currant red.

Gladioli Lemoinei 1s each: 10s per doz.

- Armenien.** Pale lilac, violet blotch.
Domino Rose. Pale cherry red, blotch straw colour.
Eclaireur. Early bright red, with dark blotch.
Eldorado. Pure yellow, blotch dark.
General Faidherbe. Carmine rose, dark purplish red blotch.
Leon Duval. Straw coloured flowers, blotched with brown.
Madrilene. Bright salmon rose, carmine blotch on white ground.
Malvina. White, suffused lilac red blotch on white ground.
Mephistopheles. Deep red, blotched black and sulphur; unique.
Tricolore. Creamy rose, suffused lilac, blotch dark violet.
Voie Lactee. White, edged lilac, dark violet blotches edged blue.

Gladioli Lemoinei at 1s 6d each; 15s doz.

- General Kouropatkine.** Dark velvety crimson-red.
Madame Desboides Voltaire. Large salmony white flowers, large scarlet blotches and edged straw.
Senateur Volland. Large flowers, pure blue, dark blotch with a yellow stain; striped blue.

Gladioli Colvillei (TRUE MINIATURE).

Plant March to July.

Charming Gladioli for cut blooms or table decoration; the graceful spikes are very light and beautiful, with delicate foliage.

- The Bride.** Pure white; a lovely variety. } 3d each;
Rosy Gem. White, with deep rosy markings. } 2s 6d doz.
Rubra. A beautiful flower, purplish red.

Gladioli Nanceianus 1s each; 10s doz.

- A. R. Smith.** Fiery carmine red, pencilled with purple and straw colour.
Abbe Roucourt. Crimson, pencilled blood red.
Alsace Lorraine. Carmine red, straw-coloured blotches.
Apotheose. Magenta red, pencilled purplish red, edged white.
Brahma. Fine carmine red, large white blotch on lower divisions.
Charles de Bosschere. Violet rose, red blotch on white ground.
Desdemone. Immense flowers, ashy rose colour, dark red blotch, edged ivory white.
Georges Frick. Crimson red, blotched brown, pencilled white.
Gustave Grunerwald. Vermilion red, fine.
Pacha. Orange red, striped red on sulphur ground.

Gladioli Nanceianus at 1s 6d each; 15s doz.

- Capitaine Braulot.** Salmon red, brown blotch on creamy white ground.
Colonel Gillon. Rose colour, lower petals blotched white and pencilled purplish red.
Ferdinand Kegeljan. Orange red, flamed salmon rose—blotched and pencilled straw colour.
G. A. Kuyk. Carmine red, blotched and pencilled purple on white.

Gladioli Nanceianus at 2s 6d each.

- Edouard Andre.** Violet red, blotches pencilled brown on white ground.

Our Choice Gladioli.

Plant February to September.

BULBS IN SPLENDID MIXTURE.

This assortment includes many superb varieties and shades of colour, and every bulb will produce a flower worth looking at, and every collection, whether large or small, will include a great variety. All these bulbs are from our celebrated collection. 5s per doz; 35s per 100.

Gladioli in Collections.

Our magnificent collection of Gladioli includes a superb variety of the various selections, which produce flowers of the most lovely colours and shades. Every dozen bulbs we send out will have a splendid variety of colour.

GLADIOLI—THE BRIDE.

Our Illustrated Seed and Plant Catalogue will be posted in March.

Hyacinths

And their
Culture ..

Plant February to May.

IN THE OPEN GARDEN. Hyacinths prefer a good sandy loam, enriched with old stable manure; peaty soils also suit them if well drained, or peat mixed with loamy or sandy soil grows them splendidly; do not succeed in dry soil. They should be planted in rows or in clumps 6 to 12 inches apart, and the crown of the bulb must be covered with at least an inch of soil. If the shoot when it comes through the ground shows an inclination to open and reveal the flower buds which it encloses, cover it up at once with an inverted flower pot, the object being to draw the flower stem from the bulb while it is enclosed in the leaves, and before the flower is exposed to the sun. If this is not done, it sometimes happens that the flower begins to color when only a portion of it has appeared, and the beauty of the spike is thus lost. Allow the flower pot to remain until the flower stem is well through and above ground; then remove it, and fine spikes will be secured. The bulbs must be lifted when they have done flowering and their foliage has died down.

HYACINTHS GROWN IN POTS are very beautiful. Plant in 6-inch pots, in rich, loamy, sandy, or peaty soil, well mixed; drain the pots well, place them in a shady or dark place until shoots appear above ground, and water sparingly, but when in full growth give a liberal allowance.

TO GROW HYACINTHS IN WATER. (Glasses for this purpose see below.) Place the Hyacinths in the glass sufficiently filled with water to allow the base of the bulb barely to touch it, and place them in a dark cupboard for about three weeks, until the roots are well started and the shoot is at least half an inch long; then remove them by degrees to a well lighted position in the room near the window, and as close to the glass as possible. Renew the water once a week, and keep it filled up to the base of the bulb only.

Hyacinths grown in water are most interesting, and make lovely plants, spikes often 9 inches long; they are very easily grown, and do well in this climate. Single varieties are the best for water culture.

Single Hyacinths.

9d each; 8s 6d per dozen.

RED, and Shades of Red.

Cleopatra. Large spike, bells salmon bluish, good.
Lord Macaulay. Bright rosy carmine.
Gertrude. Rosy pink, fine truss.
Gigantea. Blush.
General Pelissier. Deep crimson.
Lord Derby. Rose carmine striped.
Madame Hodson. Pink, good truss.
Robert Steiger. Bright crimson, large truss.

WHITE, and Shades of White.

Albertine. Pure white, fine truss.
Alba Superbissima. Pure white
Baroness von Thuill. Large handsome truss, fine.
L'Innocence. Pure white, good.
Madame de Stael. Pure white, fine truss.

BLUE, and Shades of Blue.

Baron von Thuill. Dark blue.
Charles Dickens. Pale blue.
King of the Blues. Rich dark blue.
Grand Matre. Porcelain blue, large spike.
Leonidas. Bright blue, large bells.
Mimosa. Dark purple, very distinct, almost black.
Uncle Tom. Blackish purple.

YELLOW, and Shades of Yellow.

Fleur d'Or. Fine, pale shades.
MacMahon. Pure yellow.
Yellow Hammer. Rich yellow.

Double Hyacinths.

9d each; 8s 6d per dozen.

RED.

Lord Wellington. Delicate rose.
Noble Par Merite. Deep rose.
Sir Walter Scott. Light rose.

WHITE.

Bouquet Royal. Pure white.
La Tour d'Auvergne. Pure white, early.

BLUE.

Bloksberg. Bright porcelain striped.
Lord Raglan. Bright blue.
Lord Nelson. Deep blue, fine.

YELLOW, and Shades of Yellow.

Goethe. Fine light yellow.
Sunflower. Salmon yellow.
Sovereign. Fine, good spike.

"Enclosed please find Postal Note for 5/9 in payment for Bulbs received last month. The Bulbs arrived in good condition, and I must praise you on your prompt delivery of goods."

L. T. Waldron,
11 High St.
Launceston,
Tas.

22.4.'08.

"I have great pleasure in informing you that I have received the garden tools in perfect order. They are much cheaper than I could buy them locally. They are of the best quality. You may make any use you wish of this."

John Micheau,
Curban.

SINGLE HYACINTH.

Roman Hyacinths.

3d each; 2s 6d per dozen.

EARLY WHITE.

Its pure white and deliciously-scented flowers render this variety most attractive. It makes a very pretty show when grown in pots; the spikes are small, but very pretty—4 or 5 in a 6-inch pot.

Bedding Hyacinths.

4s 6d per dozen; 30s per 100.

They are most suitable either for massing in beds or borders.

Hyacinthus Candicans.

Plant April to July.

6d each.

Distinct species of Hyacinth, producing a long spike, 4 feet high, covered with white bell-shaped flowers.

Hyacinth Glasses.

Supplied for the purpose of growing and flowering Hyacinth Bulbs in water as a drawing-room ornament.

Various Colors, 8d each; 7s dozen.

Brass Hyacinths Supports, 4d each.

For Collections of Bulbs see Inside Back Cover.

Our Illustrated Seed and Plant Catalogue will be posted in March.

Nothing can exceed the beauty of this charming family of plants, remarkable alike for their curiously constructed and quaintly marked flowers, and for the peculiar manner in which the colours are blended; they are easily cultivated.

Iris Susiana (The Mourning Iris)

1s 6d each. Plant March to June.

A distinct and most beautiful variety; flowers large, with winged petals surrounding those enclosing the centre of the flower. Ground colour pale grey, lined and veined with dark brown, resembling tracery of the finest lace. It has been named the "Mourning Iris" because of its sombre colour, but to many that only adds to the charm of its beauty.

Spanish Iris (Orchid Iris)

Plant February to May.

We have grown these extensively during the past season, and can most strongly recommend them as decorative plants. The flowers are produced on slender stems about a foot high, bearing two or three flowers each. These are most fantastically shaped and of beautiful colours—yellow, bronze, and blue, with beautiful shades and markings. A single bulb will sometimes throw three or four spikes, and these when cut will last a long time in water, as the buds continue to open. As a dinner-table decoration they cannot be excelled. They will thrive in the open or partially shaded places, and should be planted in clumps. Any average soil will grow them, provided it is well drained.

Splendid Mixture, all shades ... 3s per dozen.

Iris Kaempferi (Japanese Flag Iris)

1s each; 9s per dozen.

For size and richness of colour the following varieties of the Japanese Iris are unequalled, with an indescribable mass of colouring, flowers often measuring from 6 to 8 inches across. They grow to a height of 2 feet, and must have a moist situation; with light rich soil, swampy land will grow them well.

Large Maroon.
Dark Blue.
Large Blue and variegated
Light Maroon.
Light Blue.
Double Violet.

Plant April to August.

Brilliant Purple, yellow blotches.
Tyrian Blue, feathered white.
Navy Blue, yellow blotches.
White, primrose blotches.
Sky Blue, primrose blotches.
Lavender and White, yellow blotches.

Iris Pavonia (Peacock Iris)

3d each; 2s 6d per doz.

Plant February to May.

A beautiful variety, supporting on slender stems lilac coloured flowers with an intense blue spot on each petal.

Muscaria (Grape Hyacinth)

3d each; 2s doz.

Plant February to May.

Pretty bluish violet and white flowering bulbous plants, dwarf and free flowering.

Nerine Very handsome flowers.

Plant February to May.

Sarniensis (GUERNSEY LILY) Belongs to the Amaryllis tribe; thrives well in the open ground; flowers a pale salmon colour. 1s each.

Japonica (THE BEAUTIFUL JAPANESE SPIDER PLANT). 6d each; 4s per doz.

A very handsome plant; the flower stalks are 9 to 12 inches high, crowned with umbels of bright red flowers with long curved stamens; charming.

All Bulbs are
Post Free . .

For Hyacinth and Lilium
Collections, See Back Cover.

Montbretias

Plant March to July.

Extremely hardy free-growing plants, which flower profusely when thoroughly established. The flower stems are from 2½ to 3 feet in height, and gracefully arched, and the colours are charming—bright orange, golden yellow, orange and bright vermilion, and rose.

Named Varieties, 3 kinds. 3d each; 3s dozen.
In Fine Mixture, 3d each; 2s 6d dozen.

MONTBRETIA.

IRIS GERMANICA.

Our Stocks from seeds purchased from you are the finest I have seen; they are really magnificent.—E.W. Sparke, W. Maitland, 1-10-08.

Our large
Illustrated Catalogue
of Seeds and Plants
will be issued in
March.

Our Illustrated Seed and Plant Catalogue will be posted in March.

Lilies.

The beauty of form, the chaste delicacy of the white blooming varieties *Harrisi*, *Candidum*, and *Longiflorum*, and the magnificent colours of *Auratum* and *Lancifolium*, render these of the greatest importance as summer blooming plants. They will grow in any good garden soil, provided it is well broken up and drained, but they delight in light, fibrous, peaty soil when it is obtainable. By planting the proper varieties a display can be obtained all through the summer.

Liliums.

Plant April to July.

Harrisi (TRUE EASTER LILY). A most lovely pure white Lily, with long graceful tube-shaped flowers produced in profusion on the crest of an upright stem. Without doubt the finest Trumpet Lily ..	1s each
Longiflorum . Pure white; dwarf; long tube ..	6d each
Candidum (SINGLE WHITE LILY). Very fragrant ..	9d each
Lancifolium Album . Pure white, recurved ..	9d each
Lancifolium Roseum . White, spotted rose, flowers recurved ..	9d each
Lancifolium Rubrum . White, spotted red, flowers recurved ..	9d each
Pardalinum . Scarlet, shading to yellow, spotted purple brown; very handsome ..	9d each
Auratum (GOLDEN RAYED LILY OF JAPAN). Flowers from 8 to 10 inches across; ivory white, thickly studded with crimson spots, and a bright golden band through centre of petal ..	1s 6d each
Extra large bulbs, specially selected ..	2s 6d each
Tigrinum (TIGER LILY). Orange, spotted black ..	6d each
Tigrinum Flore Pleno (DOUBLE TIGER LILY) ..	9d each

For collection of Liliums see Back Cover.

Lachenalia.

Plant March to May.

Aurea . Golden ..	6d each
Quadricolour ..	6d each

Very free flowering; flowers yellow, margined with green, red, and orange; spotted leaves.

SEE OUR COLLECTIONS OF BULBS ON INSIDE OF BACK COVER.

LILIAM AURATUM.

"The Gladioli Bulbs that I purchased from you last season grew well, and had beautiful spikes of flowers, and were greatly admired by all who saw them."
Mrs. J. R. Jones, 159 Stewart Street, Bathurst.—28-1-08.

Ixia.

Plant March to May.

A charming family of hardy flowering plants; flowers are scarlet, lavender, white or green, on light graceful stems, produced in great profusion. Any light soil will grow them; they should be planted in clumps or in rows 4 inches apart.

Viridiflora. Green flowered Ixia. One of the few flowers of this colour: a charming variety. Stock limited. 2s per doz.

Pink . Most brilliant colour; charming flower. ..	1s 6d doz.
Yellow . Beautiful shade of yellow, dark throat ..	8s 6d 100
White . Fine pure white ..	75s 1000
Mixed . All colours ..	

Named Varieties. A splendid assortment. 3s 6d per doz.

Jonquil.

Plant March to May.

These are often confused with *Polyanthus Narcissus*; they are, however, quite distinct. The flowers are pure yellow in colour only, and much smaller in size. They are deliciously fragrant, very early, and last a long time.

Single. The true sweet-scented Jonquil. 1s 6d per doz.

Double. Yellow. 2s 6d per doz.

Campnelli. 2s per doz.

LACHENALIA.

Our Illustrated Seed and Plant Catalogue will be Posted in March.

Flowering Bulb Order—Continued.

Miscellaneous Requirements.

Our LARGE ILLUSTRATED SEED and PLANT CATALOGUE will be forwarded early in March.

DAFFODILS

Or NARCISSI

Plant February to May.

"I received the Plants in first-class condition and feel it my duty to thank you for the way in which my order was supplied."

Mrs. H. S. COTINGTON,
Post Office, Whitton.

DAFFODIL—SIR WATKIN.

Although in Australia there is no such long winter rest for bulbous plants as in England and the Continent, nevertheless these charming plants, which mark the advent of spring in the old country, have their short rest here; but as soon as the approach of spring is heralded by the sunshine and warm days, the Daffodil wakes into new life and soon puts forth its bright flowers in all its loveliness to deck our gardens and our homes, and mark the springtime with their bright beauty, just as effectively in Australia as they do in England.

There is no more easily cultivated flowering bulb, for although the Daffodil prefers a strong loam, it will grow and flower freely in any average garden soil. The land should be well worked and deeply dug, but if it is very poor, well-rotted horse manure should be dug in to a depth of 8 to 12 inches so that it does not touch the bulbs. Bone manure can be incorporated with the soil to advantage. We offer strong bulbs which will flower the first season. These should be planted 6 inches apart, and the crown of the bulb should not be covered more than 2 inches. The flowers keep a long time when cut, and retain their brilliant colours in water for several days.

Daffodils can also be grown in water with much success, and their cultivation in this way is most interesting. Half fill a china or glass bowl with pebbles, or small pieces of sandstone, so as to keep the bulbs in position; then fill in with water to reach just above base of bulbs, and keep filled up to that level when water goes down by evaporation; about 6 bulbs in a bowl will make a good show. Sir Watkin, Emperor and Empress are very suitable for the purpose.

Incomparabilis or Chalice Cupped Daffodils.

- Autocrat.** Very handsome flower; full self yellow. 3d each; 2s 6d doz.
- Beauty.** Red cup. 6d each; 5s doz.
- Commander.** Pale sulphur perianth, large yellow cup, stained orange scarlet. 1s each; 10s doz.
- Cynosure.** Large primrose perianth, and changing to white; stained orange scarlet cup. 2d each; 1s doz.; 6s 100; 50s 1000.
- Frank Miles.** Soft self yellow; very charming. 3d each; 2s 6d doz.
- Gloria Mundi.** Yellow perianth; large cup, heavily stained orange scarlet; a fine, noble flower. 3s 6d each.
- Goliath.** Large white perianth, barred yellow, large yellow cup. 9d each; 8s doz.
- Gwyther.** Large broad yellow perianth; crown suffused orange. 3d each; 2s 6d doz.
- Lorenzo.** Perianth primrose, passing to white; cup yellow, 2d each; 1s 6d doz.
- Mabel Cowan.** White perianth; cup margined orange scarlet; beautiful flower. 9d each.
- Princess Mary.** Broad white perianth; cup much expanded; smooth and suffused orange. 6d each; 5s doz.
- Queen Bess.** Pure white perianth; large, much expanded; pale yellow cup. 3d each; 2s 6d doz.
- Sir Watkin (GIANT WELSH CHALICE FLOWER).** Rich sulphur yellow perianth; cup yellow, tinged with orange; beautiful. 3d each; 2s doz.; 12s 100; £5 1000.
- Stella.** Large white perianth; yellow cup. 2d each; 1s doz.; 6s 100; 50s 1000.

"I have grown Anderson's Purple Top Swede Turnip Seed for years, and find none to equal it."

Mr. J. J. KING,
31-3-08. Alstonville, Richmond River.

Leedsii Section.

- Amabilis.** Silvery white, with long cup; very early. 3d each; 2s 6d doz.
- Duchess of Brabant.** Perianth white; cup canary. 2d each; 1s doz.; 6s 100.
- Duchess of Westminster.** Large white perianth; long soft canary cup. 6d each; 5s doz.
- Katherine Spurrell.** Broad white perianth; cup soft canary; a very beautiful flower. 9d each; 8s doz.
- Madge Matthews.** Large white perianth; elegant white cup; distinct. 6d each; 5s doz.

- M. Magdaline de Graaff.** Broad white perianth; cup suffused orange. 6d each; 5s doz.
- Minnie Hume.** Large white perianth; large spreading cup, passing from lemon to white; a chaste flower. 2d each; 1s doz.; 6s 100.
- Mrs. Langtry.** Broad white perianth; large white cup, edged bright canary yellow. 3d each; 2s 6d doz.
- Leedsii White.** Silvery white; lovely flower. 2d each; 1s 6d doz.; 9s 100; 60s 1000.

Our Illustrated Seed and Plant Catalogue will be posted in March.

M. J.
BERKLEY.

EMPRESS

DAFFODIL
COMMANDER.

DAFFODILS or NARCISSI—Continued.

Self-yellow Trumpet Daffodils

Ard Righ (IRISH KING). Large trumpet, yellow perianth, 3d each, 2s 6d doz.

Emperor. Deep primrose perianth, imbricated sepals, large rich, yellow trumpet, beautiful. 3d each, 2s doz., 12s 100.

Glory of Leiden. Very large pale yellow perianth, rich, full, yellow trumpet. 9d each, 8s doz.

James Bateman. White perianth, cup yellow, tinted orange, late. 1s each.

Major. Rich yellow, twisted perianth, hardy, late. 2d each; 1s doz.; 6s 100.

M. J. Berkley. Rich full yellow, trumpet much expanded and reflexed at edge; the best of all early trumpets. 8d each; 6s doz.

Maximus. Rich golden yellow, twisted perianth, large, late. 3d each; 2s doz.; 15s 100.

Obvallaris. (TENBY DAFFODIL). Rich yellow throughout, perfect form, most beautiful. 3d each; 1s 6d doz.

P. R. Barr. Primrose perianth, rich, full, yellow trumpet, free bloomer, 3d each; 2s doz.

Bulbocodium. (HOOP PETTICOAT NARCISSUS). Colour like the Buttercup, small flowers, large corolla, with small outer petals. 2d each; 1s 6d doz.

White Winged or Bicolor Trumpet Daffodils.

Grandis. Large and finely imbricated, pure white perianth, large full yellow trumpet. 4d each; 3s doz.

Empress. White perianth, great substance, rich yellow trumpet, 3d each; 2s doz.; 12s 100.

Horsfieldii. White perianth, rich yellow trumpet, large. 6d each; 5s doz.

Madame Plomp. Very bold flower, large, white, twisted perianth, long golden yellow trumpet. 1s each; 10s doz.

Michael Foster. Sulphur white perianth, yellow trumpet. 9d each; 8s doz.

Princeps. Pale lemon perianth, often lighter than the trumpet. 2d each; 1s doz.; 6s 100; 50s 1000.

Dean Herbert. Perianth primrose, changing to sulphur; large rich yellow trumpet. 6d each; 5s doz.

White and Sulphur Coloured Trumpet Daffodils

Albicans. White perianth, trumpet primrose, passing to white, elegantly recurved. 3d each; 2s 6d doz.

Cernuus. Perianth and trumpet silvery white. 3d each; 2s 6d doz.

Cernuus Pilcher. Silvery white, with primrose trumpet, passing to white. 6d each; 5s doz.

Helen Falconer. White trumpet, free flowering. 9d each; 8s doz.

J. B. M. Camm. Perianth white, rich cream trumpet, fine form. 1s each.

Moschatus. (WHITE SPANISH DAFFODIL). Charming dwarf variety. 6d each; 5s doz.

William Goldring. Large snowy white tapering perianth, gracefully drooping over primrose trumpet. 6d each; 5s doz.

Our Illustrated Seed and Plant Catalogue will be posted in March.

DAFFODILS or NARCISSI—continued.

Barri.

Conspicuous. Broad spreading perianth, broad short cup, conspicuously edged orange scarlet, the most beautiful of this type. 2d each; 1s doz.; 6s 100; 50s 1000.

Flora Wilson. Pure white perianth, cup stained orange scarlet, very striking flower. 6d each; 5s doz.

General Murray. Creamy white perianth, canary cup, edged orange. 2d each; 1s 6d doz.

Miriam Barton. Soft delicate primrose, distinct. 2d each; 1s 6d doz.; 9s 100.

Burbidgei.

Burbidgei. Clear white cup, margined bright cinnabar red, a beautiful early-flowering form of Poeticus. 2d each; 1s doz.; 6s 100; 50s 1000.

Ellen Barr. Broad white perianth, cup citron, stained orange scarlet. 6d each; 5s doz.

Falstaff. Perianth snowy white, cup lemon, margined orange. 2d each; 1s 6d doz.

John Bain. Large white perianth, citron cup. 2d each; 1s 6d doz.

Double Daffodils.

Double Yellow (AURANTIUS PLENUS). Double yellow, with orange centre. 2d each; 1s doz.

Orange Phoenix (ALBUS PLENUS AURANTIUS). White, with orange nectary, beautiful. 3d each; 2s 6d doz.

Sulphur Phoenix (ALBUS PLENUS SULPHUREUS). White, with sulphur nectary, exquisite. 6d each; 5s doz.

Telamonious Plenus. Great double yellow daffodil. 3d each; 2s doz.

Poeticus.

Alba Plena Odorata. Double white, Gardenia flowered, useful for cutting. 3d each; 2s 6d per doz.

Grandiflorus. Perianth pure white, cup diffused crimson. 9d each; 8s doz.

Ornatus (PHEASANT'S EYE). Single, pure white imbricated perianth, flat cup, edged scarlet. 2d each; 1s doz.; 6s 100; 50s 1000.

Poetarum. Perianth pure white, cup orange scarlet. 6d each; 5s doz.

White Pearl. Pure white, very fine flower, late. 2d each; 1s 6d doz.

Our Illustrated Seed and Plant Catalogue will be posted in March,

Ranunculus

A Lovely
Bulbous
Flower !

Plant March to June.

We very strongly recommend the beautiful Ranunculus as one of the most charming of our spring-flowering plants; the flowers are very double, and sometimes four inches across; a bed of them in full bloom is a glowing mass of colour. They prefer rich loamy soil, but will grow in any average land if well enriched. Plant at least six inches apart, and the ground made firm. PLANT CLAWS DOWNWARDS.

Special Culture see Inside Front Cover.

Turban Scarlet	1s per doz.; 5s per 100
Turban Yellow	1s per doz.; 5s per 100
Turban Grandiflora. Fine crimson and yellow	1s per doz.; 5s per 100
Turban White	1s 6d per doz.; 7s per 100
Turban Black	1s per doz.; 5s per 100
Turban d'Or Scarlet and gold	1s per doz.; 5s per 100
Carmine. A beautiful shade	1s per doz.; 5s per 100

Prince de Galitzin. Superb spotted, very distinct	1s per doz.; 5s per 100
Double French. Splendid colours	1s per doz.; 4s per 100
Persian Mixed. Very fine	1s 6d per doz.; 7s 6d per 100
Persian Finest Named Varieties. In distinct colours	2s per doz.

Ranunculus Asiaticus.

Colonial-Grown Bulbs.

This beautiful variety is more varied in colour than the popular Shirley Poppy, which it somewhat resembles. There are both double and single varieties; for hardy spring flowers few things equal them. 1s 6d per doz.; 7s 6d per 100.

Snowflake

(Leucojum Aestivum).

Plant March to May.

Snowflake.—A beautiful hardy bulb of the Snowdrop type, which it strongly resembles; the petals are prettily tipped with green; it does well in almost any soil or situation: height when in flower about 12 inches. 6d doz.; 3s 6d 100.

"The Asiaticus Ranunculus Bulbs I obtained from your firm were beyond all expectations. The colors and size of the flowers were magnificent, and are truly a wonderful strain. They were greatly admired by all who saw them."

A. E. Coleman,
Kogarah.

OF
BULBS
ARE
SPLENDID
VALUE.

Scilla.

Plant March to May.

Wood Hyacinth.—A beautiful little spring-blooming bulb; flowers principally blue shades, produced on short stem; dwarf and exquisitely beautiful. 3d each; 2s doz.

Sparaxis.

Plant March to May.

Mixed.—Embracing every shade and beautifully marked; for their refined colour and graceful habit Sparaxis never fail to win admiration; they are of easy culture; dwarf, 6 inches. 2d each; 1s 6d doz.; 7s 6d 100.

Pulcherrima (DIERAMA).—Very beautiful species, known as "Fairy Bells"; produces stems 3 to 4 feet long, with pendulous bell-shaped flowers, quite distinct from the ordinary Sparaxis. 6d each.

Our Illustrated Seed and Plant Catalogue will be posted in March.

back cover.**

Plant March to May.

This genus of old favourite flowers can be grown in parts of our State with great success, and flowered the first season after planting. They prefer a rich sandy loam, but any ordinary land can be enriched by the addition of plenty of old stable manure to grow them successfully; if the soil is inclined to be stiff, the addition of sand would be serviceable. The cooler districts of our State will grow them admirably, but they will do fairly well in other parts if a cool or shady position is selected and plenty of water given, should the weather be dry during the growing season.

FINEST MIXED TULIPS.

Double and Single Mixed. A grand variety. 2s 6d doz.

Tigridia.

Plant April to June.

Pavonia (THE TIGER FLOWER), so called from the peculiar markings of its beautiful sin le crimson flowers, which are spotted with yellow, very hardy, height 10 to 12 inches. 4s doz.

Canariensis. Yellow, scarlet spots. 6d each.

Conchiflora. Yellow and red spotted. 6d each.

Grandiflora Alba (WHITE TIGER FLOWER). White, spotted crimson, large. 9d each.

Tritonia.

Plant March to May.

Longiflora. A very useful decorative flower, allied to the Ixias, straw colour, distinct. 2d each; 1s 6d doz.

Salmon Red. A fine showy variety. 2d each; 1s 6d doz.

Mixed. From named sorts. Exceedingly free flowering and bright, quite hardy and easily cultivated. 2d each; 1s 6d doz.

Vallota Purpurea (The Scarborough Lily).

Can be Supplied at any Time.

One of the most gorgeous and brilliant bulbous flowering plants in cultivation. A lovely free flowering bulb of the Amaryllis family, suitable either for pots or borders; the flower is trumpet-shaped, produced in clusters, and of a rich orange scarlet, spike 18 inches. 1s 6d each.

Watsonia.

Plant March to May.

O'Brieni Alba. Lovely pure white. 4d each; 3s doz.

Rosea. A beautiful shade of rosy red. 4d each; 3s doz.

New Watsonia "Unique." This beautiful variety is quite distinct in habit and form to "O'Brieni." The spike resembles that of a miniature Gladioli, the flowers growing closely to the stem, the colour is a pale heliotrope striped magenta. A decided acquisition. 6d each; 5s 6d per doz.

Dry bulbs can be supplied up to the end of June, and during July and August in pots.

O'Brieni Alba is a magnificent plant; when in flower it is from 4 to 5 feet in height, and throws up enormous spikes, and produces side shoots which flower in succession for a month or 6 weeks. Very suitable for cutting.

Tuberose.

Plant April to August.

One of the most beautiful summer-flowering bulbs in cultivation; the blooms are of the purest white and of the most exquisite fragrance; they are admirably adapted for bouquet making, and are easy to cultivate.

Double Dwarf, "The Pearl." } Small clumps, 6d each; post free, 9d.
Double } Large clumps. 1s each; post free, 1s 6d.
Single }

Galanthus Nivalis

(The True English Snowdrop).

This is the true Snowdrop known so well in England, but seldom offered for sale here. They flower straight from the bulb on single stems, and are much more dwarf than the well-known "Snowflake," generally called Snowdrop in Australia. They require a cool, partly shaded situation, and give a pretty effect dibbled into grass lawns or banks. Our stock is limited, and orders should be sent early to secure them. Many of our customers have been very successful in flowering them. 3s per doz.

TUBEROSE.

Our Illustrated Seed and Plant Catalogue will be posted in March.

MISCELLANEOUS BULBS.

Anomatheca Cruenta

(Red Freesia).

A very pretty Cape Bulb, in growth very much like the Freesia, but the colour is a rich carmine crimson. 3d each; 2s 6d doz.

Agapanthus

Blue .. 9d each.
White .. 9d each.

Crown of beautiful flowers on stem 3 feet long.

Begonia Tubers.

A fine mixture, or in separate colours. Single varieties, 1s each; 10s doz. Double varieties, 1s 6d each; 15s doz.

* Can be supplied during May, June, July, August and September.

Calla.

Æthiopica (ARUM LILY). The Old Nile Lily. 1s each.

Maculata Alba. Spotted leaves, white flowers; pretty pot plant. 1s each.

Chlidanthus Fragrans.

The flowers are a pure yellow, and are very highly scented. 6d each; 5s doz.

Crinum

1s 3d each.

A beautiful plant; its habit resembles the Agapanthus. The flowers are produced in bunches on tall stems.

Capense. White, with pink stripe. Moorei. Beautiful pink.

Crocus

Best suited to the cool districts.

Blue, 2s 6d doz. Yellow, 2s doz. White, 2s doz.

Striped, 2s 6d doz. Mixed Colours, 2s 6d doz.

Old English favourite, but only suitable to the colder districts. If the situation and climate are suitable, no special care is necessary; will thrive in poorest soils.

Cyclamen.

Strong bulbs, in splendid mixture. Can be supplied during March, April and May. 1s 6d each; 15s doz.

Gloxinia Tubers.

A grand assortment of colours. Can be supplied during May, June, July and August. 1s each; 10s per doz.

Ornithogalum Arabicum (Star of Bethlehem).

A strong-growing showy plant with large bunches of flowers produced on tall stems; colour white, with dark centre, very hardy. 3d each; 2s doz.

Pancratium.

Beautiful pure white flowers, exceedingly fragrant; water freely during the growing season. 1s each.

Polygonatum (Solomon's Seal).

A graceful plant, having arching stems of pendant white flowers, partly hidden beneath its foliage. 6d each.

Zephyranthes Rosea.

A pretty little bulbous plant, belonging to the family of Amaryllis. 3d each; 2s 6d doz.
